

VSP® demonstration WebMeeting form

Virtual Surgical Planning

for orthognathics, reconstruction and cranial

About WebMeetings

We are thrilled that you are interested in our VSP® services. The best way for us to introduce the VSP® product would be through an online demonstration WebMeeting. The WebMeeting can last 30 minutes – 1 hour. During this time we will go over the preoperative protocol, case planning via a software demonstration, examples of the guides, splints and models that we can provide depending on the type of surgery, and then answer any questions you still have remaining. All that is needed at the time of the meeting is a computer with an internet connection and phone line.

Area of interest

<input type="checkbox"/> Orthognathics				
<input type="checkbox"/> Reconstruction:	<input type="checkbox"/> Fibula free flap (or other graft type)	<input type="checkbox"/> Distraction	<input type="checkbox"/> Trauma	<input type="checkbox"/> Other
<input type="checkbox"/> Cranial
