Single jaw  
splints

# Virtual Surgical Planning®

## Single jaw splints

Plan with confidence using 3D Systems' newest edition to our VSP portfolio, an on demand service for single jaw orthognathic cases. This new service is an expedited and cost effective option for single jaw orthognathic cases.

Part number	Description
VSP0SJ	VSP Orthognathic Single jaw splints

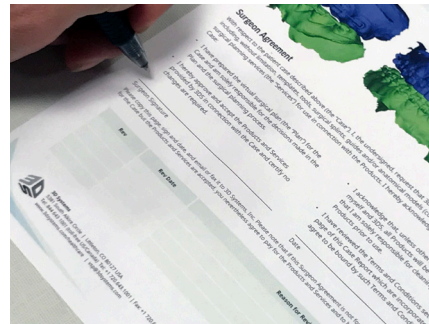

### Step 1

Submit occlusal records (traditional stone models or intraoral scans) and completed order form to 3D Systems.

### Step 2

Review and approve the final occlusion via case report or online webmeeting.

### Step 3

Final surgical splints are 3D printed and shipped for use in surgery.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
