VSP® Reconstruction
Surgical positioning guide

Advancing personalized surgery, together.
VSP Reconstruction
Surgical Positioning Guide

Positioning guide helps to ensure planned osteotomies align with patient-specific plate.

Guide allows you to fixate prior to pedicle division, potentially reducing ischemia time.

Positioning guide
Resected model with attached guide for positioning of bone graft

Predictive pegs
Guide the placement of the patient-specific plate onto the model

Scallopning
Positioning guide can be scalloped to aid in placement of patient-specific plate

Model options
Available with separate or fused maxilla and mandible models

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker and 3D Systems do not dispense medical advice and recommend that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker and 3D Systems product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker and 3D Systems product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own or have applied for the following trademarks or service marks: Stryker. All other trademarks are trademarks of their respective owners or holders.
