VSP® Orthognathics
Virtual Surgical Planning
VSP Orthognathics represents a major leap forward in virtual planning of orthognathic surgical procedures. Years of research and technology have led to the creation of a protocol that allows for accurate planning and precise clinical transfer via 3D printed splints.

- Accurately simulate orthognathic procedures in a virtual environment using CT/CBCT.
- Software planning assistance from a team of experts at 3D Systems.
- Replace traditional model surgery with virtual planning and 3D printed splints.

### Protocol

### Accuracy/outcomes

### Research/early development

For information regarding CT scanning protocols please refer to the CT scanning protocol or your Stryker sales representative.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Please visit www.3dsystems.com/medicaldata for digital transfer of DICOM images.
